G.L.F.

Garden Seed

FOR COMMERCIAL GROWERS

GOLDEN BEAUTY—A new first early market hybrid. See page 7 for description and centerfold for additional photographs.

G.L.F.

Quality Vegetable Seeds

High Quality seed that can be depended upon to grow well and produce high yields under normal growing conditions is important to G.L.F. patrons.

So that patrons can place dependence on G.L.F. seed and be sure of its high quality, a strict five-point quality control program is followed on all vegetable seed.

1. **Varieties Adapted to G.L.F. Territory**—Through careful selection and conformance to State Agricultural College recommendations.
2. **Best Strains**—Careful selections are made from all existing strains.
3. **Trial Testing**—G.L.F. maintains its own Trial Garden Farm for testing of all seed varieties and strains.
4. **Seed Production**—Managed by specialists in western growing areas.
5. **Seed Treatment**—State Agricultural College recommendations are followed.

How To Order Seed

Any variety or strain of G.L.F. Vegetable Seed is available through your local G.L.F. Service Agency, which offers an advantage to G.L.F. patrons over other methods of seed ordering.

By being able to place the order locally, G.L.F. patrons can obtain help from Service Agency personnel in selecting the right seed in the proper quantities without the bother of filling out mail orders.

Usually orders can be filled at once from the seed supply carried locally. However, should larger quantities be needed or should some varieties be out of stock, an order will be placed for you with the seed warehouse for immediate delivery.

LIMITED WARRANTY

The Cooperative G.L.F. Exchange, Inc., warrants to the extent of the purchase price that seeds or bulbs sold are as described on the container, within recognized tolerances. Seller gives no other or further warranty, expressed or implied.

Prices subject to change without notice.

VARIETY DESCRIPTIONS

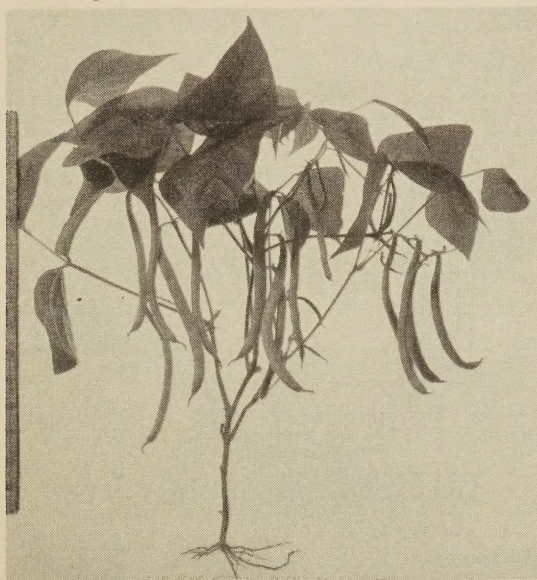

Maturity dates as found in this catalog are average dates as found on G.L.F. trial grounds at Ithaca, New York. Days of maturity will vary from year to year and section to section. Prices are based on stocks on hand and subject to change without notice.

GREEN PODDED BUSH BEANS

	1 lb.	5 lb.	15 lb.	100 lb.
Bountiful—48 days50	1.80	4.80	28.00
Plentiful—50 days50	1.80	4.80	28.00
Topcrop—51 days50	2.05	5.55	33.00
Resistant to common Bean Mosaic and New York 15 Mosaic.				
Contender—52 days50	1.90	5.10	30.00
Excellent yielder. Somewhat like Stringless Black Valentine. Contender is resistant to common Bean Mosaic, has shown considerable resistance to Powdery Mildew, and possesses heat tolerance.				
Tenderlong 15—53 days50	2.00	5.40	32.00
A selection from Tendergreen with a high degree of resistance to Mosaic diseases.				
Stringless Black Valentine—54 days .50	1.80	4.80	28.00	
Oval podded. Holds up well for market use.				
Wade Bush—54 days50	2.20	6.00	36.00
Resistant to common Bean Mosaic and Powdery Mildew. Pods are very deep green colored, round, slender, of excellent quality and are held up well off the ground.				
French Horticultural—68 days50	2.20	6.00	36.00
(Shell Beans) Pods are 7 inches long, light colored overlaid with deep red. Plants are large and tend toward runner types.				

WAX PODDED BUSH BEANS

	1 lb.	5 lb.	15 lb.	100 lb.
Cherokee Wax—52 days50	1.90	5.10	30.00
An oval, golden wax bean, nearly straight pods. Plant vigorous and heavy yielder.				
Sure Crop—53 days (Bountiful Wax)50	1.95	5.25	31.00
Pencil Pod—55 days50	2.00	5.40	32.00
Pods round, medium yellow in color.				
Round Pod—58 days (Brittle Wax) .50	2.10	5.70	34.00	
Pods round, light yellow in color. Light colored seed.				
All snap beans available in 50 lb. bags @ 1/2¢ per pound above 100 lb. price.				

Stringless Black Valentine

LIMA BEANS

Dwarf or Bush Types
(Arasan-Lindane Treated)

	1 lb.	15 lb.	30 lb.	60 lb.
Henderson—65 days50	4.50	8.40	15.60
Burpee Improved—75 days.....	.50	5.40	11.20	19.20
Beans large, slightly flattened.				
Fordhook—75 days50	5.10	9.60	18.00
Pods almost straight, thick, dark green. Seed large, green.				
Fordhook 242—75 days.....	.50	4.80	9.00	16.80
Highly recommended for market use in most of G.L.F. territory. Will withstand adverse weather conditions, particularly drought, better than Fordhook.				

BEETS

	1/4 lb.	1 lb.	10 lb.	25 lb.
Early Wonder—52 days.....	.45	1.35	13.00	31.25
Most popular bunching variety.				
Crosby Egyptian—55 days.....	.45	1.35	13.00	31.25
Perfected Detroit—60 days.....	.50	1.45	14.00	33.75
Used for commercial canning. Globe shape, deep red interior and exterior with inconspicuous rings or zones. Tops medium to large.				
Detroit Dark Red—60 days.....	.55	1.60	15.50	37.50
(Ferry Strain) Similar to Perfected, but smaller tops.				

Early Wonder

Perfected Detroit

MANGEL BEETS

Stock Beets

	1/4 lb.	1 lb.	10 lb.
Mammoth Long Red—120 days.....	.30	.80	7.50
Roots long, slightly tapering. Color light red. Flesh white with rose tinge.			

BROCCOLI

(Hot Water Treated)

	Oz.	1/4 lb.	1 lb.
DeCicco—60 days55	1.60	4.80
Noted for large crop of side shoots. Excellent for bunching or freezing. Plants medium tall, light green in color.			
Italian Green Sprouting—70 days.....	.50	1.60	4.80
(Calabrese) Produces large central head with few side branches.			

BRUSSELS SPROUTS

(Hot Water Treated)

	Oz.	1/4 lb.	1 lb.
Catskill—90 days	1.00	3.00	9.00
Small, compact, uniform plant; stem well covered with firm, round sprouts which mature in succession.			

CABBAGE

(Hot Water Treated)

	$\frac{1}{4}$ lb.	$\frac{1}{2}$ lb.	1 lb.
Golden Acre—70 days.....	1.65	2.65	5.00
Early Copenhagen Market—75 days.....	1.65	2.65	5.00
Glory of Enkhuizen—85 days.....	1.35	2.20	4.00
Most important kraut variety in yellows-free sections. Heads slightly flattened, very large, solid. Special strain selected for G.L.F. territory.			
Bonanza—85 days	3.30	5.30	10.00
A new second early, round variety with short core. This variety is noted for its long standing ability.			
Danish Ballhead (New York Type)—110 days	2.00	3.10	6.00
An excellent strain of Danish Ballhead. A uniform, large heading type, high yielding, selected for Northeastern conditions.			
Penn State Ballhead—110 days.....	1.65	2.65	5.00
Head slightly flattened, solid, high yielding.			
Chieftain Savoy—90 days.....	1.65	2.65	5.00
Red Acre—75 days.....	1.65	2.65	5.00
Mammoth Red Rock—120 days.....	1.50	2.40	4.50

CABBAGE

Yellows-Resistant Varieties

(Hot Water Treated)

	$\frac{1}{4}$ lb.	$\frac{1}{2}$ lb.	1 lb.
Resistant Golden Acre—72 days.....	2.00	3.10	6.00
Earliest of resistant strains.			
Racine Market—75 days.....	2.00	3.10	6.00
Heads round, solid, medium green.			
Resistant Copenhagen Market—75 days....	2.00	3.10	6.00
(Wisconsin Copenhagen)			
Medium Copenhagen—78 days.....	2.20	3.40	6.50
A large, firm, round Copenhagen type. May be desirable as an early kraut type.			
Marion Market—80 days.....	1.65	2.65	5.00
Resistant Glory—88 days.....	2.20	3.40	6.50
A new yellows-resistant selection from Glory of Enkhuizen.			
Wisconsin All Season—90 days.....	1.50	2.40	4.50
Heads flattened, solid, large.			
Wisconsin Hollander No. 8—110 days.....	1.65	2.65	5.00
Ballhead type used where yellows is present.			
Pennvalley—110 days	2.65	4.20	8.00
A yellows-resistant Penn State Ballhead type. A good late market variety in areas where yellows is a problem.			
Empire Danish (66E)—110 days	2.65	4.20	8.00
A new yellows-resistant ballhead type developed by Dr. Henry Munger at Cornell University. Uniform, large headed, high yielding strain, developed for main crop in areas where yellows is present.			

Danish Ballhead (New York Type)

CHINESE CABBAGE

	Oz.	¼ lb.	1 lb.
Chihli—70 days35	1.00	3.00

CARROTS

	¼ lb.	1 lb.	10 lb.
Chantenay Red Cored—70 days.....	.70	2.10	20.00
Roots deep orange, 5½ inches long, blocky, with inconspicuous core.			
Chantenay, Long Type—70 days.....	.75	2.25	21.50
Similar to Red Cored Chantenay, but averages about one inch longer.			
Nantes—70 days (Coreless).....	.85	2.50	24.00
Roots deep orange, 6-7 inches long, cylindrical.			
Danvers Half Long—75 days.....	.70	2.10	20.00
Roots 6-7 inches long, tapering; deep orange color.			
Imperator—78 days85	2.50	24.00
Root 8 inches long, slightly tapered deep orange color.			
Hutchinson—80 days75	2.25	21.50
Roots 9-11 inches long, tapering, orange color.			

CAULIFLOWER

(Hot Water Treated)

	Oz.	¼ lb.	1 lb.
Super Snowball—65 days.....	3.00	10.00	30.00
Early type used throughout G.L.F. territory.			
Improved Holland Erfurt—75 days.....	3.00	10.00	30.00
(Snowdrift) Well adapted to wide range of soils and climatic conditions.			

CELERY

Yellow or Self-Blanching Varieties

	Oz.	¼ lb.	1 lb.
Golden Self-Blanching—85 days.....	1.00	3.00	9.00
Cornell No. 19—100 days.....	1.75	5.00	15.00
Tall growing. Highly resistant to fusarium yellows.			

Green Varieties

Summer Pascal—115 days.....	1.40	4.20	15.00
Plants medium tall, stalks thick and tender.			
Salt Lake or Utah—125 days.....	1.00	3.60	12.00
Plants medium to large, stalks thick and tender.			
Giant Pascal—140 days.....	1.00	3.00	9.00
Large plants, stalks round, green and excellent quality.			

Fordhook Giant

CELERIAC

	Oz.	$\frac{1}{4}$ lb.	1 lb.
Large Smooth Prague—110 days.....	.60	1.80	6.00

CHARD

	$\frac{1}{4}$ lb.	1 lb.
Fordhook Giant—55 days (Swiss Chard).....	.50	1.50

SWEET CORN

Hybrid Varieties—Yellow

Treated with Arasan-Lindane. Graded for size.
All commercial lots of 25 lbs. or more carry planting plate recommendations.

All hybrids have some resistance to Stewart's disease, or wilt. This is more pronounced in some varieties than in others, but none is entirely immune.

	1 lb.	5 lb.	25 lb.	100 lb.
Spancross (C13xC3)—65 days.....	.60	2.50	11.25	43.00
Ears are 6-7 inches long, 12 rows, large kernels and fair quality.				

Golden Beauty (C13x21547)—

70 days60	2.60	12.25	47.00
---------------	-----	------	-------	-------

Golden Beauty has been awarded an All America trial Silver Medal for 1955. This new early season hybrid was developed by W. H. Lachman at the University of Massachusetts. Attractive ears of good quality combined with more resistance to wilt than possessed by most early varieties makes this a very promising early market variety.

Marcross (C13xC6)—72 days.....	.60	2.50	11.25	43.00
Ears $7\frac{1}{2}$ inches long, 12 rows. Good quality.				

Carmelcross (C13xC30)—80 days....	.60	2.50	10.75	41.00
Ears $7\frac{1}{2}$ inches long, 12 rows; well filled and attractive.				

Pilgrim or Early Lee (M32xC27)—

82 days60	2.50	11.25	43.00
---------------	-----	------	-------	-------

Hoosier Gold (C30xG8)—84 days....	.60	2.50	11.50	44.00
-----------------------------------	-----	------	-------	-------

A new mid-season yellow hybrid maturing 4 days to a week ahead of Golden Cross. Ears average $\frac{1}{2}$ inch longer than Golden Cross, are slightly thinner and have 12-14 rows of medium depth kernels. Under certain conditions of low moisture or low soil fertility ears show tendency to blank at tips.

Lincoln (P39xC23)—85 days.....	.60	2.50	11.25	43.00
Ears 8-8 $\frac{1}{2}$ inches long, 14 rows. Quality fair.				

Golden Cross (P39xP51)—88 days..	.60	2.50	11.00	42.00
(Golden Cross Bantam) Our strain unsurpassed for vigor, yield and quality. Ear 8 inches long, 12 rows, well filled.				

Ioana (P39xI45)—88 days.....	.60	2.50	10.75	41.00
Developed to withstand drought conditions, Ioana is almost free from suckers. Ears 7-8 inches long, well filled and attractive.				

Iochief (453x5125)—90 days.....	.60	2.60	12.00	46.00
14-18 rows, deep kernels of good quality.				

Iosquaw (453x5145A)—90 days.....	.60	2.60	12.50	48.00
Similar to Iochief except that inner silks are white. Trials last year indicate that Iosquaw is more susceptible to wilt than Iochief.				

Hybrid Varieties—White

Stowell's Evergreen Hybrid

(14.11x13)—95 days60	2.50	11.25	43.00
--------------------------	-----	------	-------	-------

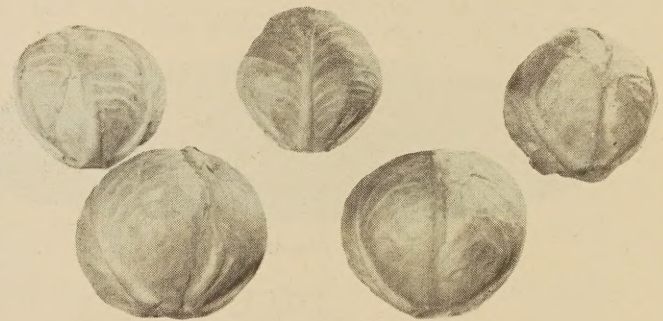

All corn in 50 lb. lots @ 100 lb. rate. 500 lbs.—1¢ less than 100 lb. price.

IOANA SWEET CORN

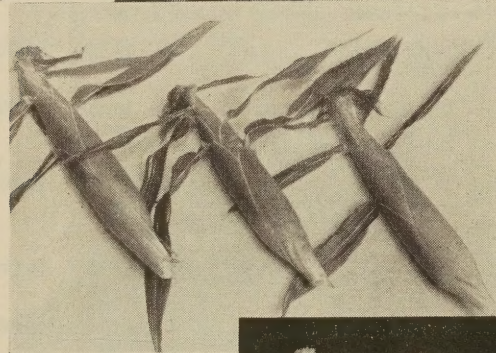

Drought and wilt resistance have made Ioana a very popular market variety during the past few years.

EMPIRE DANISH CABBAGE

Resistance to yellows should make this new, uniform, high yielding strain very popular.

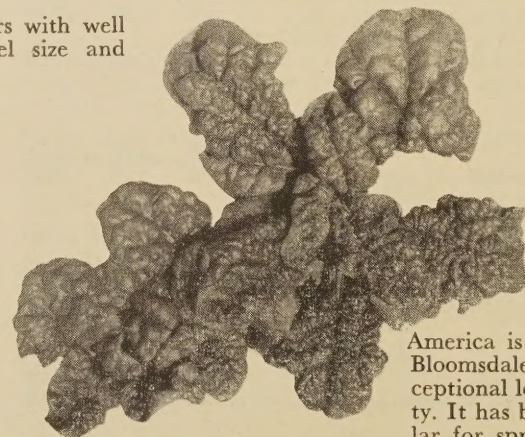

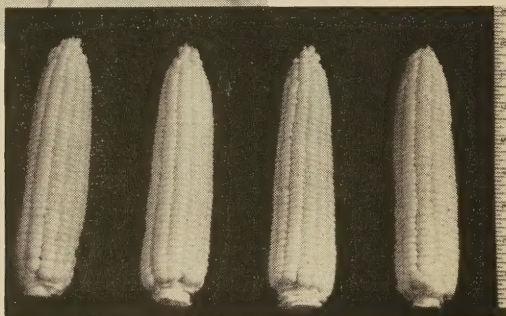

GOLDEN BEAUTY CORN

Vigorous plant with desirable tall tillers.

Attractive ears with good husk color, good covering at ear tips and long flag leaves.

Uniform, attractive ears with well filled tips, good kernel size and straight rowing.

AMERICA SPINACH

America is a Long Standing Bloomsdale type with exceptional long standing ability. It has become very popular for spring planting.

POPCORN

	1 lb.	10 lb.	100 lb.
White Hull-less Hybrid (250xHMP)—80 days75	7.00	55.00
Ears 4-5 inches long. Rice type kernels.			

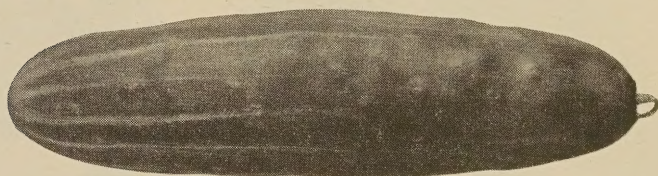

CUCUMBERS

(Corrosive Sublimate and Arasan Treated)

	1/4 lb.	1 lb.	10 lb.
National Pickling—52 days75	2.25	21.50
Black spined pickling variety.			
Yorkstate Pickling—52 days85	2.50	24.00
A new Mosaic resistant variety similar in type and performance to National Pickling.			

Slicing Varieties

Marketer—62 days85	2.50	24.00
Prolific, dark green variety. Fruits set and mature well over a long pickling season.			
Niagara—63 days95	2.75	26.50
A Mosaic resistant slicing cucumber having very dark green color and uniform diameter from end to end.			
Early Fortune—65 days65	2.00	19.00
Fruits 8-9 inches long, dark green with white spines.			
Straight Eight—66 days85	2.50	24.00
Fruit 8-9 inches long. 1½ inches thick, straight.			
A & C—68 days85	2.50	24.00
Fruit 8-9 inches long, dark green, medium thick.			

Marketer

DILL

	1/4 lb.	1 lb.	10 lb.
Mammoth—70 days35	1.00	9.00
An annual. For flavoring stews, sauces and pickles.			

EGG PLANT

	Oz.	1/4 lb.	1 lb.
Black Beauty—80 days85	2.50	7.50
Fruits large, blocky pear shape, deep glossy purple color.			

ENDIVE

	1/4 lb.	1 lb.	10 lb.
Broadleaf Batavian or Escarolle— 90 days (Full Heart)65	2.00	19.00
Large leaf, fairly upright in habit.			
Green Curled—95 days65	2.00	19.00
Leaves curly, deeply cut, green ribbed, white centers.			

KALE

	1/4 lb.	1 lb.	10 lb.
Dwarf Blue Curled—85 days90	2.70	26.00
Improved strain of Dwarf Scotch.			

KOHLRABI

	1/4 lb.	1 lb.	10 lb.
White Vienna—55 days	1.20	3.50	34.00

LEEK

	1/4 lb.	1 lb.	10 lb.
American Flag—150 days	2.00	6.00	59.00

LETTUCE

Loose Leaf

	<u>¼ lb.</u>	<u>1 lb.</u>	<u>10 lb.</u>
Salad Bowl—42 days	1.50	4.50	44.00
Forms a large plant consisting of many short, closely set, curly, deeply cut, rich green leaves. Plants are slow to bolt.			
Grand Rapids—42 days70	2.10	20.00
Large, light green, curly leaves.			

Heading Varieties

	<u>¼ lb.</u>	<u>1 lb.</u>	<u>10 lb.</u>
White Boston—75 days75	2.25	21.50
Butterhead type with light green leaves and creamy white heart. Leaves smooth, forming a loose head.			
Imperial 44—82 days	1.20	3.60	35.00
Pennlake—84 days	1.85	5.50	54.00
Excellent upland variety, also performing well on muck early in season.			
Cornell 456—85 days	1.85	5.50	54.00
Widely used on muck soils.			
Great Lakes—88 days	1.85	5.50	54.00

COS OR ROMAINE

	<u>¼ lb.</u>	<u>1 lb.</u>	<u>10 lb.</u>
Trianon Cos—70 days (White Paris)70	2.10	20.00

MUSKMELONS

(Corrosive Sublimate and Arasan Treated)

	<u>¼ lb.</u>	<u>1 lb.</u>	<u>10 lb.</u>
Delicious 51—83 days	1.65	3.50	34.00
Fusarium Wilt resistant strain of Delicious.			
Golden Delight—88 days	1.50	4.50	44.00
A large, broad, oval melon, a trifle earlier and larger than Pride of Wisconsin. Flesh thick; deep orange color.			
Benders Surprise—90 days	1.00	3.00	29.00
Pride of Wisconsin—90 days	1.05	3.20	31.00
Iroquois—95 days	1.20	3.50	34.00
Resistant to Fusarium Wilt. Fruits large, well ribbed and netted.			
Hearts of Gold—95 days	1.00	3.00	29.00

ONIONS

	<u>1 lb.</u>	<u>10 lb.</u>	<u>100 lb.</u>
Hybrid Early Yellow Globe—			
95 days	10.00	98.00	
A high yielding hybrid with good skin color. Very uniform in size and shape.			
Early Yellow Globe—98 days	4.00	38.00	375.00
Ebenezer or Japanese—105 days	4.00	38.00	375.00
Iowa Yellow Globe 44—105 days	4.00	38.00	375.00
A new storage onion developed for muck soil, derived from Brigham Yellow Globe. Very uniform, good skin, excellent keeper.			
Autumn Brown—105 days (Hybrid)	8.00	78.00	
An attractive globe shaped onion with heavy, dark brown skins. Good yielder and excellent keeper.			
Michigan Yellow Globe—110 days ..	4.00	38.00	375.00
(Brigham Strain) Excellent strain.			
Sweet Spanish—110 days	6.00	58.00	575.00
(Utah Strain)			
Green Bunching—60 days	4.00	38.00	375.00
(Scallions)			

PARSLEY

	<u>¼ lb.</u>	<u>1 lb.</u>	<u>10 lb.</u>
Moss Curled—70 days50	1.50	14.00
Plain or Dark Green Italian—			
80 days55	1.65	15.50
Hamburg—90 days (Heimisher)50	1.50	14.00
Parsnip rooted.			

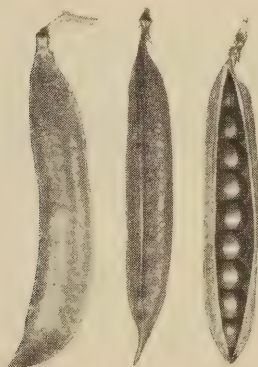

PARSNIP

	<u>¼ lb.</u>	<u>1 lb.</u>	<u>10 lb.</u>
All American—95 days50	1.50	14.00

PEAS

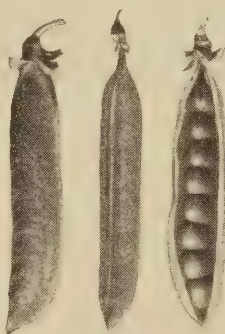

(Spargon Treated)

	1 lb.	25 lb.	50 lb.	100 lb.
World's Record—56 days45	7.75	14.50	28.00
(Early Gradus) Pods are 3½ inches long, pointed, dark green.				
Thomas Laxton—58 days45	7.25	13.50	26.00
Pods 3½ inches long, blunt, dark green. Vine 3 feet tall.				
Freezonian—60 days45	7.25	13.50	26.00
A much improved Thomas Laxton type. Vines are heavy, about 3 feet tall, bearing dark green, blunt, well-filled pods, averaging 3½ inches.				
Little Marvel—60 days45	8.25	15.50	30.00
Pods 3 inches long, blunt, tightly filled, dark green. Very prolific. Vines 24 inches tall.				
Laxton's Progress No. 9—62 days45	8.25	15.50	30.00
Pods 4 inches long, pointed, large peas. Vines 18-20 inches tall. Wilt resistant.				
Gradus—63 days (Improved)45	7.00	13.00	25.00
Pods 3½ inches long, pointed, dark green. Vines 3½ to 4 feet tall.				
Oneida—65 days45	8.25	15.50	30.00
Originated especially for freezing but equally as desirable for market use. Pods 3½ to 4 inches, dark green, blunt, borne in pairs. Resistant to Fusarium diseases. Vines 30 inches tall.				
Laxtonian—66 days45	8.25	15.50	30.00
(Blue Bantam, Hundredfold) Similar to Laxton's Progress.				
Alderman—70 days (Telephone)45	7.50	14.00	27.00
Pods 4½ inches long, pointed. Vines 4-5 feet tall.				

Laxton's Progress
No. 9

World's Record

PEPPERS

	Oz.	¼ lb.	1 lb.
Early Giant—63 days	1.00	3.00	9.00
Pennwonder—65 days	1.00	3.00	9.00
Early Calwonder—68 days	1.00	3.00	9.00
World Beater—72 days85	2.85	8.50
Burlington—72 days	1.00	3.00	9.00
A Mosaic resistant strain of World Beater. Fruits blocky with medium thick flesh.			
California Wonder—75 days85	2.85	8.50
Fruits, large, smooth, blocky with very thick flesh.			

PUMPKINS

	¼ lb.	1 lb.	10 lb.
Small Sugar—110 days60	1.75	17.00
(New England Pie) Small orange-colored fruits for pies.			
Connecticut Field—115 days60	1.75	17.00
Large fruits 15-20 pounds, yellow-orange color.			
Sweet Cheese—120 days60	1.80	17.50
(Long Island Type) Creamy-buff skinned, flat fruit averaging 12-15 inches in diameter.			

RADISHES

	1 lb.	10 lb.	100 lb.
Comet—25 days	1.10	10.50	100.00
Tops are slightly larger than Short Top Scarlet Globe, bulbs round, bright clear red.			
Scarlet Globe—25 days	1.00	9.50	90.00
(Market Garden Strain) Special strain with medium tops.			
Scarlet Globe—25 days	1.20	11.50	110.00
(Short Top Strain) Selected for those who prefer a short top strain.			
Southern Market Globe—25 days	1.20	11.50	110.00
Selected for hot weather use. Has non-bolting tendency. Roots retain globe shape and remain crisp under unfavorable conditions.			

RUTABAGA

	¼ lb.	1 lb.	10 lb.
Long Island Improved—95 days45	1.35	13.00
(American Purple Top) Roots large yellow with purplish crown.			

SALSIFY

(Or Vegetable Oyster)

	Oz.	¼ lb.	1 lb.
Mammoth Sandwich Island—135 days50	1.40	4.20
Roots 8-9 inches long, thick and white.			

SPINACH

	1 lb.	10 lb.	100 lb.
Virginia Blight Resistant—40 days ..	.55	4.75	40.00
For fall planting. Resistant to blight.			
Long Standing Bloomsdale—45 days55	4.75	40.00
For spring planting. Leaves large, dark green, thick and heavily savoyed, or crumpled.			
America—50 days60	5.25	45.00
(Bloomsdale Extra Long Standing Darkgreen) For spring planting. Slightly smaller than Long Standing Bloomsdale. Leaves are thick, real glossy, very intense dark green and very well savoyed. Very slow to form seed stalks.			

SQUASH Summer Type

	¼ lb.	1 lb.	10 lb.
Early Prolific Straightneck—50 days65	2.00	19.00
Fruits smooth, bright yellow, uniform.			
Early White Bush Scallop—50 days (Patty Pan)60	1.75	16.50
Caserta—50 days90	2.50	23.00
Light glossy green with broken stripes of dark green. Plant is bush type with deeply cut leaves.			
Cocozelle—55 days75	2.25	21.50
Fruits dark green, striped.			
Black Zucchini—60 days (Dark Green Zucchini)75	2.25	21.50
Dark green, almost black, with no striping or mottling.			

Fall and Winter Type

Table Queen—85 days75	2.25	21.50
(Mammoth or Royal) Fruits are 5-6 inches long, pointed and ridged; dark green in color.			
Butternut—90 days	1.25	4.50	44.00
Selected for a blocky type with thick neck.			
Buttercup—100 days	1.10	3.25	31.50
